EARTHQUAKE IN TURKEY

Yesterday, there was an earthquake in Turkey of magnitude 7,8. This earthquake caused 38 004 deaths. Families are destroyed, everyone is in shock because no one expected it. Thousands of buildings are destroyed.

A Turkish resident testifies : "I only remember being buried under the rubble, everything was black. It was so dark that I couldn't even see my own body, I shouted and called but there was nobody, our building has 15 floors. I was a little relieved when I heard the noises above the rubble, so I screamed until my throat had swollen. Firefighters threw a water bottle, I drank everything, sorry of what I'm going to say but I peed in it and I let it rest. I drank water when it was cold, and that's what saved my life. At last, I saw that there was a hole in the rubble when I heard the rescuers. I screamed too and raised my hand. I screamed so loud that they heard my voice, someone reached out and touched my hand. I just want to say THANK YOU. Thank you rescuers."
